

# Weekly Report

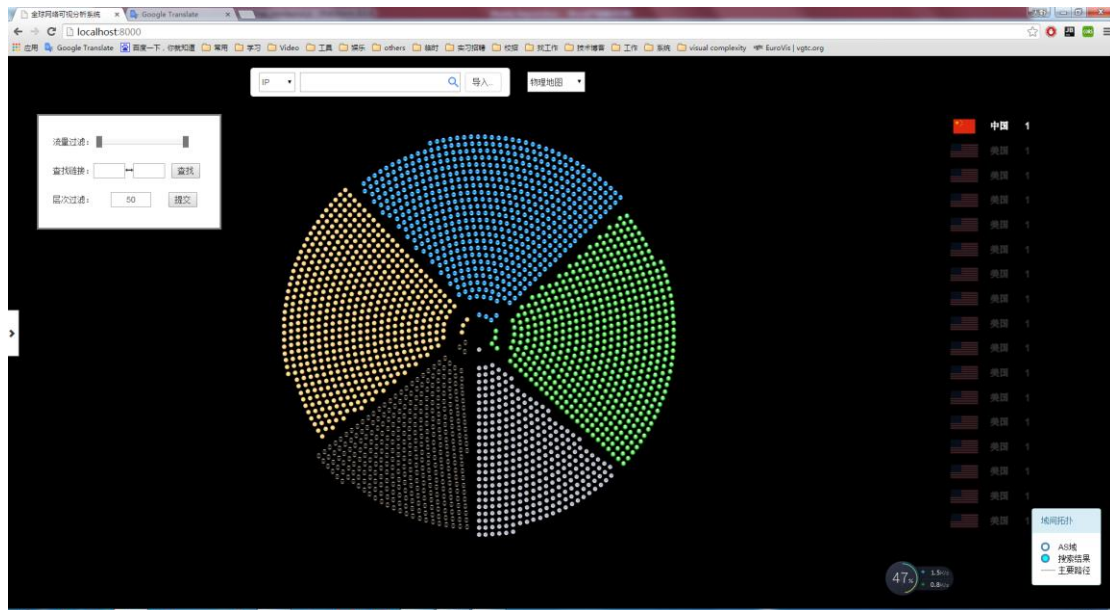

2015.01.11-2015.01.17

## 1.Project

### Global Network Project

- write the demand document and design document according to the new needs
- write the country chosen interface of the topology part of this project as below. The paddings between countries can be adjusted according to the number of countries. And when the user choose one country, the others will be hidden. Curves are also drawn to show the connection between country and as domains, although we finally decided that it is not necessary and should be removed.

## 2. Paper Reading

### Network visualization

- make it clear that this paper is a visualization survey of cyber security
- find 5 papers about network visualization survey as well as cyber security among TVCG 2015 and Eurovis 2014 & 2015 papers and roughly read them to get a basic understanding of how to write a network visualization survey.

### Mobility Graph

- read the paper: Reconstructing Storyline Graphs for Image Recommendation from Web Community Photos, to figure out the methods in this paper that we can also use in the mobility program (Actually haven't finished reading this paper yet.)

## 3. To Do

- keep up with the Global Network Project and revise the code of the topology part
- go through the TVCG papers to find more paper about network visualization and cyber security and make a outline list of them
- finish reading the storyline paper
